4TH GEN - AUTOMATIC TRANSMISSION SHIFTER LOCK

We'll be the first to admit that most auto security devices by themselves can be defeated. The latest thought is that several devices placed on a vehicle may be enough to deter the potential thief, or at least send them down the road to another car. While other devices are expensive to install, or cumbersome to handle, our Shifter Lock is sweet, and to the point. We feel this Lock is an additional defense against auto theft. It's even small enough to store in the console when not in use. Read on for our sweet, to the point installation.

Parts Needed:

719068 1984-02 Shifter lock

Fits all 1984-2002 Camaros with automatic transmission.

Tools Needed:

Two hands

Time Frame:

Installs in seconds

Photo #1: The lock is actually a clamshell style hardened cast aluminum case with a heavy-duty key lock and tumbler with a hardened pin.

Photo #2: The unit opens up to encapsulate the shift knob.

Photo #3: Shift Lock fits all automatic transmission equipped Camaros from 1984-2002

Photo #4: Here we have the unit installed around the shift knob. The idea is to prevent the lockout button from being depressed, effectively locking the transmission in park.

Photo #5: With the Shifter Lock installed its bright red color makes it plainly visible.
